

competitive spirit

hp LaserJet 8150

performance

A high performance network printer ideal if you require fast, high quality, black and white output. The HP LaserJet 8150 gives you the reliability and flexibility to produce various documents with a professional finish.*

stay ahead of the game

Your business will be goal oriented. You expect maximum performance to deliver the best results, and you rely on the right equipment to support your endeavours and let you realise your ambitions. HP has designed the new HP LaserJet 8150 with you in mind.

To stay ahead of the game you need power, speed and precision. The HP LaserJet 8150 series delivers high volume, high-speed monochrome print and copying output with no compromise on quality, and at a great price. What's more it has a wealth of innovative features designed to optimise performance and let you maintain your competitive edge.

Using 21st century technology the HP LaserJet 8150 is the most advanced network printer in the market, the first of a new generation of HP Internet enabled printers that harness the incredible power of the Internet to facilitate workflow and improve document management at your desktop. From simple document printing to more specialised applications, the HP LaserJet 8150 is a big hitter, built to meet your goals efficiently and cost-effectively.

hp LaserJet 8150/n/dn

hp LaserJet 8150mfp*

start off on the right foot

As your business outputs change, adapt and expand, you need a printer which can keep up with your evolving needs. The HP LaserJet 8150 series is ideal for networked groups of users undertaking multiple, complex tasks with high volume output.

hp LaserJet 8150 C4265A

A reliable, high volume printer ideal for departments or workgroup users who need flexibility to produce a variety of documents and require fast, reliable high quality output up to A3 paper size.

- 250 MHz processor
- 32 MB memory
- HP Fastres 1200 for 1200dpi quality printing
- common interface across PCL5e, PCL6
- edge-to-edge printing
- improved help messages and support
- job retention features, 2 out of 4 now enabled in RAM
- firmware stored in flash memory
- variable fusing
- 2 DIMM slots open (except Hebrew, Greek, Cyrillic and Arabic who have 1 free slot)
- 3 EIO slots open
- 3 metre parallel cable (only in base unit)

hp LaserJet 8150n C4266A

A reliable, high volume printer ideal for departments or workgroup users who need flexibility to produce a variety of documents and require fast, reliable high quality output up to A3 paper size. This model has the added benefit of a network card.

- 250 MHz processor
- 32 MB memory
- HP Fastres 1200 for 1200dpi quality printing
- common interface across PCL5e, PCL6
- edge-to-edge printing
- improved help messages and support
- job retention features, 2 out of 4 now enabled in RAM
- firmware stored in flash memory
- HP LaserJet 8150 web access DIMM
- variable fusing
- 1 DIMM slot open
- 2 EIO slots open
- pre-installed HP Jetdirect 610N internal print server for Ethernet 10/100Base-TX

reliable

hp LaserJet 8150dn C4267A

A reliable, high volume printer ideal for departments or workgroup users who need flexibility to produce a variety of documents and require fast, reliable high quality output up to A3 paper size. This model has the added benefit of a network card, and the HP automatic duplex unit which lets you print on both sides of the paper.

- 250 MHz processor
- 32 MB memory
- HP Fastres 1200 for 1200dpi quality printing
- common interface across PCL5e, PCL6
- edge-to-edge printing
- improved help messages and support
- job retention features, 2 out of 4 now enabled in RAM
- firmware stored in flash memory
- HP LaserJet 8150 web access DIMM
- variable fusing
- 1 DIMM slot open
- 2 EIO slots open
- pre-installed HP Jetdirect 610N internal print server for Ethernet 10/100Base-TX
- HP automatic duplex unit for printing both sides of the sheet

expandable

hp LaserJet 8150mfp C9135A

The modular, high volume, network printer and convenience copier with a wealth of features, geared to the varied demands of larger workgroups. This printer brings printing, copying and electronic document distribution via digital sending to e-mail into the department.

- 250 MHz processor
- 32 MB memory
- HP Fastres 1200 for 1200dpi quality printing
- common interface across PCL5e, PCL6
- edge-to-edge printing
- improved help messages and support
- job retention features, 2 out of 4 now enabled in RAM
- >2 GB hard disk
- firmware stored in flash memory
- HP LaserJet 8150 web access DIMM
- variable fusing
- pre-installed HP Jetdirect 610N internal print server for Ethernet 10/100Base-TX
- HP automatic duplex unit for printing both sides of the sheet
- digital copy module for digital copying
- digital sender module for send to email
- additional 32MB memory (total 64MB)
- I/O port for 3rd party job accounting hardware and software

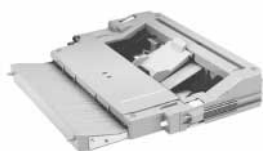

versatile

effortless results

hp paper handling and finishing options

The comprehensive paper handling capabilities of the HP LaserJet 8150 series establish a new standard for network printing. The latest technological developments in paper handling ensure easy, stress-free operation and achieve outstanding results.

No matter how complex your document, the HP LaserJet 8150 has the flexible solution to handle the output, and create professional printed material. The variety of accessories available gives you a comprehensive choice of finishing options for your documents and helps you to manage your workflow more efficiently.

hp automatic duplex printing

HP's automatic duplex unit (included in DN version) significantly reduces paper usage and consequently cuts costs. Precision printing in A4 and A3 sizes, on both sides of the sheet, is a practical way of outputting large documents in an easy-to-read format. Duplex registration ensures that both sides of the page are correctly aligned.

hp mailbox (5 bin with stapler, 7 bin tabletop and 8 bin)

Three options which provide an efficient, cost-conscious means of controlling departmental output. Jobs can be separated and collated individually. You can assign an output bin to a group of users or individuals so you know where to collect your printed material from. The 5 bin mailbox also gives you the option to staple your documents automatically.

hp 3000 sheet stacker or stapler/stacker

Pages are stacked from bottom to top. Multi-page documents can be easily collated and stapled. The stapler has alternative configurations for multi-position stapling (6 different positions), this allows you to select the best staple placement for your printed document. This device is also capable of job offset so it is easy to grab printed sets.

hp input trays

The Custom Media Tray is designed to handle different sizes and types of media. This tray slots in to replace trays 3 or 5 when needed. The high capacity HP 2000 sheet input tray means that fewer paper refills are required. The standard capacity 2 x 500 sheet input trays are ideal for different paper needs, for example letterhead can be placed in one tray and invoice sheets in the other, so there is no need to change the trays' content every time.

hp envelope feeder

Has a capacity of 100 envelopes and can cope with five different sizes.

hp digital copy stand

The HP digital copy stand supports the copy module, which is part of the HP LaserJet 8150 MFP model or the HP LaserJet MFP upgrade kit. It is designed to integrate the printer with the copy module, so that it is a complete unit. The HP digital copy stand is recommended for the MFP model and comes with professional installation.

teamwork

Your business needs and HP print solutions add up to a winning formula. HP's track record in developing customised solutions, geared to meet the demands of 21st century business, is unsurpassed.

The modular configuration of the HP LaserJet 8150 series means you can choose exactly the right printer set up for your current needs, with the reassurance of an upgrade path to meet your future requirements, however specialised. It enables you to streamline the working process delivering faster results directly from the desktop.

Take your team to the top of the league with the HP LaserJet MFP upgrade kit.

The functionality of the HP LaserJet 8150 MFP can make a big difference to the way you manage your department's workflow, by bringing printing and copying much closer to the workgroup. The facility to produce copies with original print quality directly from the printer eliminates time consuming trips to the photocopier. Digital sending of documents via e-mail and LANFax greatly improves the speed of internal and external communications, and therefore saves time and money. HP's reliable printer platform guarantees minimum downtime and ensures seamless network integration.

hp LaserJet mfp upgrade kit C4166B

Allows HP LaserJet 8000/8100/8150 owners to add copying and digital sending functionality to their printers. Kit contents:

- digital copy module (scanner, touch screen, EIO card)
- 32 MB memory DIMM
- hard disk drive with firmware preloaded
- firmware DIMM
- digital sender software
- user's guide on CD
- hard copy installation instructions

Optional extras:

- H2872A/E - installation packs
- C4231A - HP digital copy stand
- C8539AB - send to LANFax. Send hardcopy documents via LANFax to any fax machine
- C9122AB - NT authentication. Secure, accurate sender identification through utilisation of the sender's Microsoft Windows NT user name and password

faster network performance

New, even faster, efficient network management delivers faster results over your network. HP's new generation of internal print servers HP Jetdirect 610N are the replacement of the existing HP Jetdirect 600N series. The new HP JetDirect 610N print server for 10/100BaseTX networks is HP's response to new and future features in HP's new high-performance printers, which require a network card with a faster more flexible architecture.

Optional extras

- J4169A - HP Jetdirect 610N internal print server for Ethernet 10/100Base-TX networks
- J3112A - HP Jetdirect internal print server for token ring 4 & 16 Mb (RJ45 and DB9)
(to be replaced with J4167A as of Spring 01)
- J3111A - HP Jetdirect internal print server for 10BaseT (RJ-45), 10Base2 (BNC), LocalTalk
- J3110A - HP Jetdirect internal print server for 10BaseT (RJ-45)
- J4135A - HP Jetdirect connectivity card for USB, serial and LocalTalk
- C4103A - fast infrared connect
- C2985B - >2 GB disk drive

made to measure

whole in one

Your **Accounting** department probably needs to produce multiple versions of financial plans, complex reports with graphs and graphics, and spreadsheets from PC applications such as Excel, as well as purchase orders and invoices. To do all of this you need a printer which can handle large print volumes, process complex files quickly, output custom sizes and provide the option of printing on different media. The HP LaserJet 8150 has high capacity paper trays, a custom media tray, and the option of paper handling accessories like the Duplo DBM-80H booklet maker which means that reports can be output as professionally finished booklets. You might need to print confidential financial data. The HP LaserJet's job retention features let you do this. With proof and hold, you can check the first draft prior to printing all copies, and private print lets you output the document securely at your convenience with PIN code protection.

high impact

If your business is **Marketing**, you will be routinely producing large mailings which need personalising. You have the flexibility to do this with the HP LaserJet 8150. It has the capability to handle sophisticated graphics, so printing high quality sales literature and marketing collateral is easy. You can use different types of media for different messages. You can also print black and white presentation slides for overhead projection. The auto duplexing unit lets you print on both sides of the paper, and you can use it in conjunction with different finishing options to create professional looking documents like training manuals. Tight deadlines mean peak workloads and consequently high printer demand, the HP LaserJet 8150 has the power, speed and functionality to cope effortlessly.

passing the baton

General **Office Administration** can be greatly underrated and often overlooked. Not by HP. The everyday needs of the user are easily met by the HP LaserJet 8150. Each member of the team has to operate consistently well for the wheels to turn smoothly, and the HP LaserJet 8150 has the multi-functional capabilities to make this happen. Specialised functions such as producing delivery documents to accompany the dispatch of goods can be easily managed.

With the digital sender module you can send the information via e-mail direct from the printer. No need to send lots of faxes, which are time-consuming and expensive. With the MFP upgrade kit you have the added benefit of convenience copying, brought directly into your workgroup.

going the distance

Shipping and Distribution departments have very specific needs. These include multi-part, multi-colour forms, barcodes and shipping lists of up to 180 pages. You need a printer which has highly flexible paper handling and finishing options. The HP LaserJet 8150 has multiple input trays which make printing complex forms easy as you can select different trays for different weights of paper and use coloured paper as separator pages to identify each element of a document. The 2,000 sheet input tray means you can print large lists without interruption to top up the paper trays, and large jobs can be sorted easily with the multi-bin mailbox option. The stapler/stacker can collate multi-page documents in batches and staple each individual job or you can use the job offset feature. If you use pre-printed forms to accompany dispatch of goods, you can store the forms electronically, update them as necessary and print them on demand, which saves time and ensures accuracy.

winning hands down

As your office applications become more specialised, your users' expectations increase. HP knows that innovation can make the critical difference between producing an average product and one that excels in its field. The HP LaserJet 8150 series has a range of features, which make a real difference.

job retention

Now you can decide how and when a job is printed by using the job retention features.

private job (enabled in RAM) lets you print confidential documents securely, and is easily activated using a personal PIN.

proof and hold (enabled in RAM) allows you to check the first document thoroughly before copies are output to print, saving you time and paper.

stored job (optional hard disk required) is ideal for on demand printing of frequently required documents such as letterheads and fax sheets.

quick copy (optional hard disk required) lets you print additional copies of your last job directly from the printer, eliminating the need to call up the job on your PC screen. So there is no need to re-send it across the network.

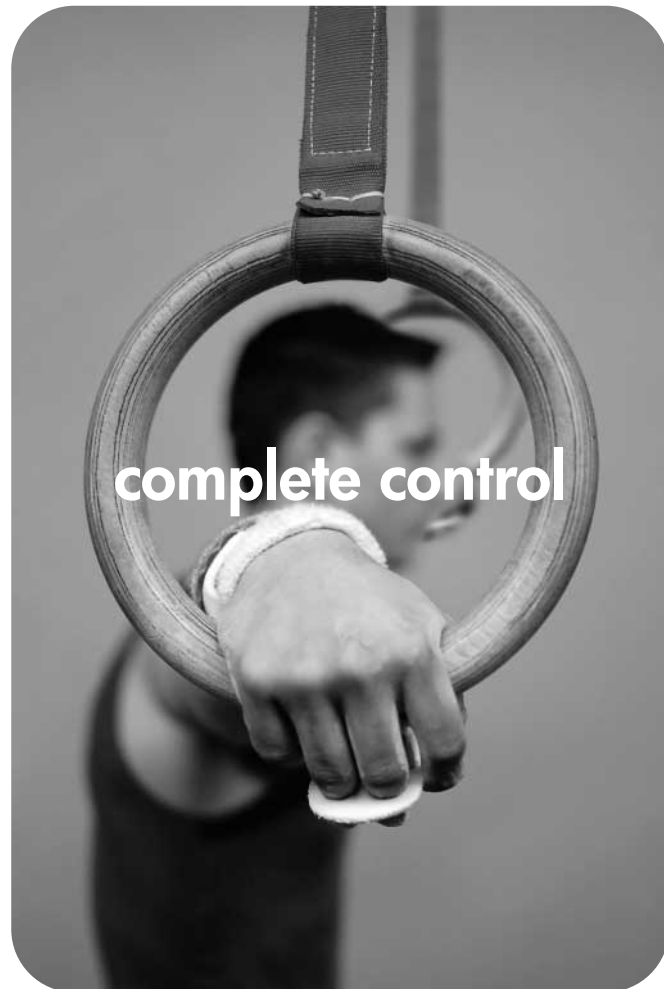

job ageing is accessible for system administrators via the control panel and through HP Web Jetadmin. System administrators can decide when to delete processed print jobs.

edge to edge printing This feature allows you to change the margins of a document to print 2mm from the edge of the paper. It can be used on all standard paper sizes, and is ideal for specialised printed output such as forms and barcodes.

duplex registration for accurate matching of the image on the front and back page of a duplex printout

remote firmware upgrade HP firmware is now stored in flash memory, which allows the firmware to be upgraded over the network via the hp.com website. It's easy to access and the upgrade process is simple and highly efficient. Great for future enhancements.

digital sending Sending documents to e-mail and LANFax with the MFP option can save time and effort. Digital sending will also transfer your hardcopy document into electronic form with ease, and provide a valuable digital archiving facility, with other third party software applications.

complete control

extended printing solutions

Together with our worldwide network of HP Jetcaps partners we can offer you a full range of business printing solutions along with consulting and implementation services:

- printing from SAP R/3
- barcodes (even the most complex ones)
- electronic forms and stationery
- corporate design
- check printing (OCR and MICR)
- secure printing using SmartCards
- cost-controlled printing and copying
- print job accounting
- printer-based alarm and audit capabilities
- special industry solutions

**raising
your game**

hp leading the field with scalable remote printer management

Once again HP leads the field with the development of web enabled, scalable remote printer management, an exciting innovation which will revolutionise printer management, increase end user productivity and save you time. Remote management with the HP LaserJet 8150 web access DIMM (C9129A included in N, DN and MFP versions) and HP Web Jetadmin 6 (available on HP.com) lets you take advantage of the huge information sharing and exchange that the Internet provides. The HP LaserJet 8150 is the first HP Internet enabled hardcopy printer, using an embedded web server within the printer to connect you to the corporate Intranet and the Internet.

giving you control and management wherever you are

With the optional HP LaserJet 8150 web access DIMM, remote printer management is a dynamic resource that allows you to easily change any individual printer's configuration setting, monitor printer status, and assist with consumables ordering, allowing you to efficiently manage your printer across the network. This means that no matter where the printer is located, you can manage it remotely via the Intranet or Internet.

Using HP Web Jetadmin makes it easy to configure printers via multiple device configuration to deal with different tasks, according to your needs. HP Web Jetadmin can be integrated with enterprise management applications such as HP Openview. You can also keep track of the number of printers on the network. The benefit of remote network management is that you need fewer resources, you use less time and consequently your management costs are lower.

One of the key differentiators in HP's solution for remote management is the integration of the HP LaserJet 8150 web access and HP Web Jetadmin 6. These two resources operate cooperatively in a managed network environment, providing the benefits of scalable remote printer management in a logical and complimentary way.

email notification keeps your maintenance ahead of the game

Printer maintenance is greatly enhanced through access to remote status information. For example, it lets you manage consumables more easily by giving you levels for all consumables. Through HP Web Jetadmin, it can be configured such, that the MIS Manager is notified by e-mail when a consumable is low or has run out, and can take the appropriate action to replace it. Remote status also lets you see which printer accessories are installed.

even while you're on the run you get support

With the HP LaserJet 8150 you have the assurance of outstanding support with remote management capabilities scalable to your network environment. Configurable printer alerts can be set up to send problem and status alerts to anyone you choose via e-mail or even to a mobile phone (if autoforwarding to mobile phone is operative on your email server). So if the toner is low or the paper is jammed you can notify the right person in the right department. It's a neat way of resolving problems quickly, so there's less downtime, more productivity and less time wasted of valuable management resources. You have immediate access via the web to extensive self-help information, so you can identify any problems and solve them, which also minimises end user dissatisfaction.

hp LaserJet 8150

technical specifications

| | |
|--------------------------------------|---|
| speed and performance | 32ppm A4, 16ppm A3 . Duty cycle: 150,000 pages/month. 250 MHz QED processor. HP Transmit Once technology for reduced network traffic and HP RIP Once technology for faster job processing. |
| resolution | HP Fastres 1200 (1200-dpi quality) at engine speed. 600 x 600 dpi with Resolution Enhancement technology (RET). |
| memory | 8150, 8150N, 8150DN, 32 Mbytes standard RAM with Memory Enhancement technology (MET). 8150MFP, 64 Mbytes. Memory expandable up to 160 Mbytes. Optional >2 Gbyte disk drive for storage of forms, fonts and signatures as well as Mopy and Rip Once. |
| printer languages | HP PCL 5e, HP PCL 6, and HP PostScript Level 3 emulation. Automatic language switching. |
| font capabilities | 80 scalable TrueType® fonts built in. Intelifont rasterizer built in to PCL 5. Greek, Hebrew, Cyrillic, and Arabic fonts available. |
| connectivity | Bi-directional, IEEE 1284-compliant parallel port. 3 EIO expansion slots for optional HP Jetdirect and third-party cards. N, DN and MFP version include HP Jetdirect 610N internal print server for Ethernet 10/100Base-T (RJ-45) (J4169A). Optional HP Jetdirect print servers are available for Ethernet 10Base-T (RJ-45) (J3110A), Ethernet (RJ-45, BNC) and Local Talk (J3111A), Token Ring (J3112A), USB, Serial and Local Talk (J4135A) |
| printer management | The HP LaserJet 8150 supports all advanced printer management features of HP web jetadmin. HP web jetadmin printer management software provides easy setup, use and management, extensive realtime diagnostics, remote visibility and printer control for any HP LaserJet printer connected via an HP Jetdirect printserver. HP web jetadmin provides the industry's most complete, multi-vendor printer management using the Standard Printer MIB, and supports both TCP/IP and IPX/SPX protocols. HP web jetadmin 6 is available via www.hp.com/go/webjetadmin . SNMP and the industry-standard printer MIB compliant for network management compatibility. |
| paper handling | Up to 5 input sources with a total capacity 3100 sheets up to 3500 sheets output capacity. |
| input standard | Tray #1 (multipurpose tray): up to 100 sheets (also handles custom size paper) minimum size 98mm x 191mm to maximum size 297mm x 450mm. 60-199g/m ² . Two 500-sheet trays: tray #2 (A4, B4, letter, legal) and tray #3 (A4, B4, letter, legal, A3): 60-105g/m ² . |
| optional | HP 2000 sheet high capacity input tray A4, B4, letter, legal, A3. 60-105g/m ² . HP 2x500 sheet multi purpose input tray: tray #4: A4, B4, letter, legal; tray #5: A4, B4, letter, legal, A3. 60-105g/m ² . Custom-size tray for non-standard paper sizes ranging from 148mm x 210mm to 297mm x 432mm. Replaces tray #3 or tray #5, simplex only. (up to 350 sheets) |
| output standard | HP automatic duplex unit (standard on DN and MFP bundle) capable of handling up to A3 sheets. 60-105g/m ² . Envelope types: tray #1 and optional 100-envelope power feeder: 10 Regular, Monarch, DL, C5 and B5 |
| optional | Capacity of 500 sheets face down, 100 sheets face up. |
| optional | HP 8x250 bin mailbox. HP 5x250 sheet mailbox with stapler. HP 7x125 bin tabletop mailbox. Optional HP 3000 sheet stacker with job offset stacking. Optional HP 3000 stapler/stacker with job offset stacking and multi-position stapling. 3rd Party Solutions: Duplo DBM-80H Booklet Maker, Rutishauser Towerfeed Accessories. |
| printer control panel | 2x16 back lit display with rocker switches to go forward or reverse through the menus. (Go) button and (Cancel Job) feature at the printer. Printer control messages can be displayed in 17 languages. |
| digital copy module | The HP LaserJet 8150 MFP includes the HP digital copy module that provides copying and digital sending capability. Specifications include: Flatbed copying; max. document size 279mm x 432mm 50 sheet automatic document feeder (60-105g/m ²) Single pass two-sided scanning Single pass automatic two-sided copying with dual scan arrays and straight-through paper path LCD display with touchscreen control panel Background removal, brightness/contrast adjustment – 5 levels Reduce/enlarge with automatic scaling or in 1% increments between 25% and 200% Copying in text, auto, or photo mode Number of copies: 1-999 Digital Sender Module (Scan-to-email), optional Scan to LAnFax C8539AB Intuitive operation and complete, easy-to-understand messages Dimensions: (W x H x D) 1092mm x 660mm x 559mm for copy module |
| environmental ranges | Temperature for printer and toner: Operating 10° to 32.5°C. Storage: 0° to 35°C. Humidity: Operating 20% to 80% RH. Storage 10% to 95% RH. Acoustics: Operating position – L<59 dB (A) printing. L<41 dB (A) standby. Bystander 1m – L<52 dB (A) printing. L<37 dB (A). Sound Power – L=6.5 bels printing, L=4.9 bels (A) standby |
| power requirements | Power Source: 100 to 127 volts (+/-10%) or 220 or 240 volts (+/-10%). Printer's voltage ranges depends upon the country in which the printer is purchased. Frequency: 50 or 60 Hz (+/- 2Hz). Power Consumption: Printing – 645 to 685 watts (average). Standby – 145 to 165 watts (average). Powersave – 31 to 40 watts (EPA Energy Star) Compliant. |
| dimensions (w x h x d) | 566 x 520 x 540 mm (without optional input and output devices) |
| weight | 51 kg (base engine) |
| product certifications | UL and cUL listed; C-22-2950 certified; Nom-NYCE Approved, carries CE marking for Eu EMC and Low Voltage Directives, complies with IEC 950/EN 60950 and IEC 825-1/EN60525-1 (Class 1 Laser Product/LED Product), meets FCC level B limits and CISPR22 level B, product CDRH certified (safe for office/EDP use) |
| year 2000 and euro compliance | The HP LaserJet 8150 and MFP including all the software, hardware, firmware and accessories meet Year 2000 Compliance and support the Euro currency symbol |
| warranty | One year on site warranty |
