

What should a printer do? Better question: What shouldn't it?

Lexmark Multifunction Printers do just about everything that can be done to a document.

Network Scanning

Lexmark's robust, intuitive network scanning functions enable users to create and deliver high-quality images in PDF, TIFF, JPEG and PostScript formats simply and affordably. Distribute, capture and manipulate electronic documents by scanning to e-mail or scanning to PC. Scan to FTP for remote copy and internal fax applications.

Faxing

Cost-saving, user-friendly fax functions eliminate the expense of traditional fax machines. Speed dial, group fax, and paper-saving options increase productivity by optimizing document delivery.

Printing

Superior performance and network-proven reliability, based on a flexible and scalable architectural platform, enable users to produce high-quality documents at the lowest total cost of ownership. Drive productivity with advanced network print functions including confidential print, document bar coding and electronic forms.

Copying

Easy-to-use functions, based on a distributed, "scan once/print many" foundation, increase user productivity. Advanced functions include electronic collation, enlargement/reduction, document finishing and paper-saving options.

Improving Workflow Efficiency

Lexmark's Document Distributor software system improves workflow efficiency and increases productivity by streamlining document delivery and management methods.

Digital technology has become a vital element of life today. In the modern workplace, multifunction solutions based on network laser printing are most desirable. Why? According to an IDC study, network laser printers provide superior quality documents more reliably and cost effectively than digital copiers and copier-based multifunction devices.¹ In addition, printers require less maintenance, perform more efficiently on networks and are easier to deploy and manage than alternative technologies.

Lexmark's multifunction systems, based on a network laser printer foundation, provide world-class copying, faxing and network scanning functions in a convenient, integrated system, complemented by a common, easy-to-use interface. Compatible with Lexmark's outstanding MarkVision™ device management system and innovative Optra Forms™ electronic forms option, Lexmark's MFPs provide highly-functional and cost-effective solutions to your present and future document production and delivery needs.

Digital Copying

Technology	Monochrome laser	Monochrome laser	Monochrome laser	Color laser
Speed	20 cpm ²	25 cpm ²	35 cpm ²	24 cpm black, 6 cpm color ²

Additional Features: Enlarge/Reduce, Paper Saver, Electronic Collation, Simplex to Duplex, (Duplex to Simplex and Duplex to Duplex standard with X522 MFP, W810s, and X6100 MFP Option with W820, not shown)

* Requires Ringdale Token-Ring to Ethernet bridge for full functionality in Token-Ring environment

** Requires Document Distributor Advanced Edition

*** StapleSmart™ Finisher available with T620 and T622 with MFP options

¹ Lexmark X242 and X443 multifunction options are compatible with entire T series

² "Scan once, print many" operation

³ Lexmark X720 MFP is shown with optional furniture, sold separately

Lexmark Document Distributor
Customizable document software, for use with Lexmark multifunction printers, that automates manual processes to integrate paper and digital document workflow, optimizing productivity and reducing costs.
