

DCP-8025D and DCP-8025DN – Duplex function

Your Brother DCP-8025D and DCP-8025DN are duplex-ready straight from the box. There's nothing to add or set up – just plug in, connect up and you're ready.

Automatic Duplex printing

The best of both worlds – not only can you produce professional-looking, two sided documents, but you can also drastically reduce your paper consumption.

Just select the duplex option in the printer driver and your machine will do the rest.

Duplex Copying

Place single sided originals into the Auto Document Feeder of your machine, and you can automatically copy to both sides of the output paper. Again, enhancing the look and finish of your documents and saving you paper.

Multi-purpose tray

A built-in, multi-purpose tray comes as standard with the Brother DCP-8025D and DCP-8025DN machines.

Labels, transparencies, envelopes, letterheads, invoices, orders – anything that is not 'standard' paper – you can use them all easily and efficiently, and in quantities of up to 50 sheets at a time.

Brother consumables

We've put considerable effort into making the replacement of consumables for our machines as easy as possible.

The benefits of this to you are:

- You only need to order and stock one range of consumables to keep all your Brother machines working at their optimum efficiency, as their toners and drums are all compatible with the complete range of products in this, our latest generation of machines, including DCP products and Printers.
- Replacing consumables is easy as, once again, the design is common across all of our product range.
- Replacing toner and drums is very cost-effective as they come separately, helping reduce wastage and overall costs.
- You have the choice of high and standard yield toners, so you can pick the one that best suits your needs and your budget.

The consumables:

TN-7300 – Standard yield toner

TN-7600 – High yield toner

DR-7000 – Printing drum

Technical Information

General

Engine	Laser
LCD Display	5 lines x 22 characters
Memory Capacity	32MB standard / 160MB maximum
Automatic Document Feeder	Up to 50 sheets
Paper handling size	A4/LTR/LGL/BS/A5/B6/A6/EXE
Paper Capacity	Standard paper cassette: Up to 250 sheets Optional paper cassette: Up to 250 sheets (LT-5000) Output paper capacity: Up to 150 sheets Multi-Purpose Tray: Up to 50 sheets * (Print/Copy) (Print/Scan)
Simultaneous Operation	

Laser Copier

Speed	Up to 16ppm
Resolution	Max. 1200 x 600dpi
Multi copy	Produces up to 99 copies of each original
Stack & Sort	Stacks or sorts output copies as desired
Enlargement / reduction ratio	25% - 400% in 1% increments
N in 1	Compress 2 or 4 pages on to a single sheet
Poster Printing	Enlarge image to poster size
Manual Duplex copying	Standard On DCP-8025D and DCP-8025DN

Laser Printer

Speed	Up to 16ppm
Resolution	Max. 2400 x 600dpi
Standard print language	Windows GDI
Emulation	PCL6 & BR-Script 3
Secure Print	Prevents unauthorised printing of protected documents
Automatic Duplex printing	Standard On DCP-8025D and DCP-8025DN

* DCP-8025D & DCP-8025DN only

COPY

PRINT

SCAN

Three functions,
one machine;
no loss of quality

Laser Copying

All the performance you could want from a desktop copier – but with the added bonus of two more essential office functions: printing and colour scanning. Its flatbed design accommodates full size A4 and Legal originals, and you don't have to stand over the machine slavishly changing page after page of your original, thanks to its Automatic Document Feeder that can handle up to 50 sheets of A4. Similarly, you won't have to stand around feeding it sheets of copy paper – it has a standard paper capacity of 250 A4 sheets, which can be expanded up to 500 sheets with the addition of the optional lower cassette tray. Up to 99

copies can be produced at one time, and stack and sort functions make sure that there's no longer the need to rearrange or hand-collate documents after copying. You can also be sure that you're going to get more of what you're copying because, unlike many competitor machines, your Brother machine will copy up to approx 2mm of the left and right edges, and up to approx 3mm of the top and bottom edges. And to complete its impressive performance, the 2 in 1 and 4 in 1 scale function and poster print options enable you to maximise your paper efficiency.

Colour Scanner

One of the few machines in its class to offer a colour scan facility with the addition of a simple-to-use 'Scan to' function. Press the 'Scan to' key and you have the choice of scanning directly to OCR, e-mail, image or file, which not only gives you precisely the right format for you to use the scan whichever way you want to, but could also save you all the time and bother of what could otherwise be a complex operation. And the quality of your scans are on a par with anything you could expect from a stand-alone unit: a resolution of up to 9600 by 9600 pixels per inch. Besides these three fully-featured functions, this machine also gives you simultaneous operation – this means that, for example, you can start scanning while a print-out is being generated, a true time saving benefit. You also have a large, five line back-lit display to make operation simple – especially with the clear instructions it shows. Whatever you're doing: copying, printing or colour scanning, you can be sure of a professional output.

Laser Printing

In terms of quality, speed, memory and connectivity, you'll find you have the equal to a specialised, stand-alone laser printer. The print quality is truly impressive, with a resolution of up to 2400 by 600 dots per inch, so every sheet is crisp and clear. The speed is fast – up to 16 pages per minute, so you won't be waiting around for your document print-outs. There's a generous 32MB of memory as standard, so it can more than cope with office demands – and should those demands increase, there is the option to expand the memory up to as much as 160MB. With PCL@6 and BR-Script 3 (PostScript 3 language) emulations installed and with the choice of parallel, USB 2.0 and optional network connectivity, connecting to machines operating the most popular PC operating systems presents no problem at all. And with Secure print for Windows@ also installed, all your confidential documents will stay that way.

Software

By using excellent software Brother enhance the benefits of owning a multi-function machine.

- Scansoft Paperport@ 8.0SE* Organise your photos and scanned paperwork into easy to find, use and share digital files.
- TextBridge@ OCR software* Scan a document and this software allows you to edit the text in a digital format.
- Presto! PageManager for Macintosh™ including OCR* Allows you to use your Brother machine with an Apple Mac in complete confidence – includes OCR capability.

* See driver table for details on your operating system.

Network Connectivity as standard

Thanks to our NC-9100h Network Interface, connecting your machine to a network couldn't be simpler – and this connectivity comes as standard with the DCP-8025DN and is available as an option with both the DCP-8020 and DCP-8025D.

The NC-9100h is specifically designed to make implementation into the majority of networks effortless, as it supports industry standard speed (10/100Base TX) and protocols (TCP/IP/IPX/SPX/AppleTalk).

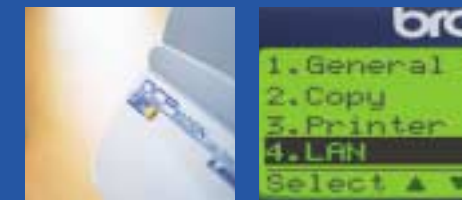

For the User

Network Printing

- Compatible with the most popular protocols and platforms, including Microsoft Windows®, Macintosh™, Novell, Unix and Linux operating systems, the combination of the NC-9100h and your Brother machine, with its outstanding paper capacity and print-out speed, make it more than capable of coping with network demands.

Network scanning

- Scansoft PaperPort 8.0SE with 5 user licence
- Brother control center for effortless Network Scanning
- 'Scan to' key functionality
- Further optional 5 user licence agreements to extend workgroup capability up to a maximum 25 users

For the IT Administrator

Network Management

To ensure that your network truly works means that you need to be able to manage it easily and effectively, and we are happy to play our part in making your life easier. As such, we've made available a number of tools to help you proactively manage your network-connected printers and DCP's.

We've also embedded a Web Server. This means that, regardless of your web browser, you can easily manage your Brother machine.

Making day-to-day management easy, we've included e-mail notification that will alert you, your administrators or other users when a consumable is running low or when an error has occurred.

And to make our network management offering complete, we provide our BRAdmin Professional Software for administering LAN connected printers and DCP's. An Enterprise edition of this software for administering WAN connected printers and DCP's can be downloaded from the web-site shown below.

Networking your Macintosh™ with Rendezvous

Our first Rendezvous-ready DCP product. Using the optional NC-9100h makes connecting your DCP device to the network easy. It uses industry standard networking protocols and zero configuration technology to automatically discover and connect devices on an IP network.
